

# Compliance checklist

To review compliance regulations and standards, read the [controls, frameworks, and compliance](#) document.

## ☒ **The Federal Energy Regulatory Commission - North American Electric Reliability Corporation (FERC-NERC)**

The FERC-NERC regulation applies to organizations that work with electricity or that are involved with the U.S. and North American power grid. Organizations have an obligation to prepare for, mitigate, and report any potential security incident that can negatively affect the power grid. Organizations are legally required to adhere to the Critical Infrastructure Protection Reliability Standards (CIP) defined by the FERC.

### **Explanation:**

Because Botium Toys has 99% of their business online, they need to be compliance with these regulations.

## ☒ **General Data Protection Regulation (GDPR)**

GDPR is a European Union (E.U.) general data regulation that protects the processing of E.U. citizens' data and their right to privacy in and out of E.U. territory. Additionally, if a breach occurs and a E.U. citizen's data is compromised, they must be informed within 72 hours of the incident.

### **Explanation:**

Many users of Botium Toys have their account and personal info entered into their website, that's why they need to be aware of GDPR.

## ☒ **Payment Card Industry Data Security Standard (PCI DSS)**

PCI DSS is an international security standard meant to ensure that organizations storing, accepting, processing, and transmitting credit card information do so in a secure environment.

**Explanation:**

Because of the online shopping feature of their online business, almost all customers are making online payments thus the need for PCI DSS is mandatory.

☐ **The Health Insurance Portability and Accountability Act (HIPAA)**

HIPAA is a federal law established in 1996 to protect U.S. patients' health information. This law prohibits patient information from being shared without their consent. Organizations have a legal obligation to inform patients of a breach.

**Explanation:**

NA

☒ **System and Organizations Controls (SOC type 1, SOC type 2)**

The SOC1 and SOC2 are reports focusing on an organization's user access policies at different organizational levels. They are used to assess an organization's financial compliance and levels of risk. They also cover confidentiality, privacy, integrity, availability, security, and overall data safety. Control failures in these areas can lead to fraud.

**Explanation:**

Since their website is going to be having a lot of data of hundreds of customers. It is important to respect their privacy, by maintaining the CIA triad and limiting user's access to only their needs.
